GreenBump
SUSTAINABLE SPEED BUMPS

The world's only speed bump with a warranty

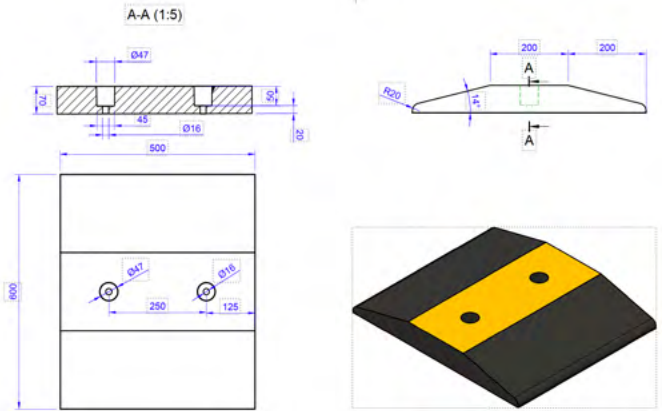

GreenBump® is a high-performance speed bump, specially designed for areas with heavy and intensive traffic.

Made in Europe (Belgium) from hard plastic waste previously considered unrecyclable, it is 100% recyclable and combines robustness, durability and environmental friendliness.

GreenBump® is easy to install and comes with a 10-year warranty – the ideal, sustainable solution for securing logistics platforms, industrial sites and other commercial areas.

Key benefits

+ Exceptionally resistant to **heavy loads** and **intensive traffic**
+ Up to **20x** more resistant than a standard speed bump
+ **European manufacturing** – short supply chains
+ **Easy to install**
+ Warranty* **10 years**
+ **100% recyclable**, made from hard plastic waste
+ **Certified CO2 benefit (independent LCA – EN 15804)**
  Each module avoids 52.4 kg CO2 compared with a rubber speed bump, i.e. 9.4 times fewer emissions over the entire life cycle (LCA – University of Liège).
  A verifiable figure, ready to use in your carbon footprint report.

Technical data sheet

Standard module length	600 mm
Width	500 mm
Height	70 mm
Weight per module	~20kg
Material	RTC (Reprocessed Thermo Composite)
Available colours	Yellow / Black / customisable (on request)
Load capacity	> 40 tonnes (heavy traffic)
Fixings	Galvanised steel lag screw 16x200 / Nylon plug without collar 20x200 / S-Large galvanised steel washer M16-17x45x4 (Supplied with the product) - on level ground

GreenBump SUSTAINABLE SPEED BUMPS

acsys SAFETY & PREVENTION

GreenBump®: the only speed bump with a 10-year warranty.

Designed for over 40 tonnes and up to 20 times more durable than a standard speed bump, GreenBump® offers unrivalled robustness even under intensive traffic.

Made in Europe (Belgium) from hard plastic waste previously considered unrecyclable, it is 100% recyclable and comes with a 10-year warranty.

Each GreenBump® module avoids 52.4 kg CO2 compared with a rubber speed bump, i.e. 9.4 times fewer emissions over the entire life cycle. Certified by an independent LCA from the University of Liège (EN 15804 standard), verifiable and usable for your CSR/CSRD reporting.

Quick to install and low-maintenance: an economical and sustainable solution for your logistics platforms, industrial estates and other shared areas.

With GreenBump®, you choose performance, reliability and environmental commitment.
